Answering Yours of 2-4th.

Mr. O. C. Bosbyshell, Supt.,
U. S. Mint, Phila.

Dear Sir:-

We have had the new press done for some time and it is running very successfully. We tried the new feeding attachment a few days ago and found a few little points that needed altering and we thought best to experiment with it and run it here a little while before notifying you to come down and inspect it as of course anything of this kind, being entirely new, should be carefully tested. We will let you know early next week what day to send your representative and will hurry it all we can. We are sorry to have kept you waiting longer than the time expected but decided in getting it up to embody a number of improvements not at first thought of. You will hear from us again soon about the matter.

With the writer's regards, we are
Yours truly,
Ferracute Machine Co.,
